🚌 Where Is My Bus - User Manual

Version: 1.0
Date: February 2026

This document provides a step-by-step guide on how to install, run, and use the "Where Is My Bus" real-time tracking application.

1. Installation Guide

Before running the application, ensure you have **Node.js** and **MongoDB** installed on your system.

Step 1: Install Dependencies

Open your project folder in VS Code and run the following commands in the terminal:

1. Open a terminal and navigate to the `server` folder:

```
cd server
npm install
```

2. Navigate to the `client` folder:

```
cd ../client
npm install
```

Step 2: Seed Database (First Time Only)

To load sample routes and bus data:

```
cd ../server
```

```
npm run seed
```

2. How to Run the Project

You need to run the Database, Backend, and Frontend simultaneously.

1. **Start Database:** Open a terminal and run:

```
mongod
```

2. **Start Backend Server:** Open a new terminal:

```
cd server
npm run dev
```

Success Message: Server running on port 5000

3. **Start Frontend Client:** Open a new terminal:

```
cd client
npm run dev
```

App will open at: http://localhost:5173

3. How to Use the Application

Open your browser and verify the address: http://localhost:5173

👨‍💼 Admin Mode (Add Routes)

To create new bus routes and manage stops:

1. Click on **Login** or navigate to the Admin section.
2. Use the following default credentials:

Email: admin@whereismybus.com
Password: admin123

After logging in, you can create new routes by clicking on the map to add stops.

🚚 Driver Mode (Share Location)

To simulate a moving bus:

1. Go to the **Driver** section.
2. Select an active **Bus Number** from the dropdown.
3. Click **Start Journey**.
4. The app will now broadcast your current location (simulated or real GPS) to all users.

👤 User Mode (Track Bus)

To track a bus as a passenger:

1. Go to the **Home** page.
2. Enter your **Source** (e.g., Chennai Central).
3. Enter your **Destination** (e.g., Tambaram).
4. Click **Search** to see available buses.
5. Click **Track** on a bus to see its live movement on the map.

4. Troubleshooting

Common Issues:

- **Map not loading:** Check your internet connection (needed for OpenStreetMap).
- **Login fails:** Ensure MongoDB is running (`mongod`).
- **No live updates:** Ensure both server and client terminals are running without errors.
